MERCURY IN RETROGRADE

Mercury retrograde is an astrological phenomenon that occurs when the planet Mercury appears to move "backward" in its orbit from our perspective on Earth, although it is actually an optical illusion caused by the difference in the orbital speeds of Earth and Mercury.

During Mercury retrograde, it is said that communication, travel, and technology tend to fail or become complicated. It is a time for reflection, reviewing plans, and avoiding major decisions. However, it is also an opportunity to reevaluate and reorganize aspects of our lives, finding clarity amid the chaos.

Dates:

- March 15th to April 7th
- July 18th to August 11th
- November 9th to November 29th

GENERAL NOTES:

Meteorologic observations are mere probabilities for the indicated period, and do not indicate reassurance that they will happen as predicted in this Almanac.

The images of the moons every day of the year correspond to the shape in which the moon is visible from the Earth in the Northern hemisphere.

The rising times for the Moon are given in local time for each country.

---- Moon's rising or setting hour is not registered as it will happen at dawn of the next day.

Indicates the festive day with the color corresponding to each month.

MOON CHARACTERISTICS

The Moon is a rocky celestial body with a diameter of approximately 3,474 kilometers, which is about one-fourth the diameter of the Earth. Its surface is dotted with deep craters and tall mountains, formed by meteorite impacts and past geological activity. It is primarily composed of oxygen, silicon, calcium, magnesium, and aluminum.

The lunar atmosphere, known as the exosphere, is extremely thin and cannot retain gases like oxygen or regulate temperature. As a result, temperatures on the lunar surface vary drastically, reaching up to 110°C during the day and dropping to -170°C at night.

The Moon does not emit its own light; it reflects sunlight. For this reason, the Moon is visible from Earth and shows different phases, which are the result of the varying position of the Moon relative to the Sun and Earth. These phases include the new moon, waxing, full moon, and waning. The complete cycle of lunar phases lasts approximately 29 days, 12 hours, and 44 minutes, known as the lunar month.

These characteristics make the Moon an object of great interest for science and space exploration.

YEAR OF THE SERPENT

The Wood Snake is one of the combinations of elements in the Chinese zodiac, occurring in a 60-year cycle. In the Chinese zodiac, each sign is associated with one of the five elements (Wood, Fire, Earth, Metal, and Water), which influences the personality and destiny of those born in that year.

Date:	January 29th, 2025 - February 16th, 2026.
Sign:	Wood Snake.
Characteristics:	Wise, creative, sensitive, and vain.
Element:	Wood.
Color:	Blue
Polarity:	Yin
Years:	1965 and 2025

Characteristics of the Wood Snake:

Wood Element: Wood symbolizes growth, flexibility, and creativity. Wood Snakes are generally seen as more open and cooperative than Snakes of other elements.

Personality: Wood Snakes tend to be wise, intuitive, and diplomatic. They are creative and seek balance and harmony in their lives. They excel at planning and organizing, and while they may be reserved, they also have a kind and generous side.

In summary, the Wood Snake combines the cunning and charm of the Snake with the expansive and generous qualities of Wood, making people born under this sign particularly talented in communication and in building lasting relationships.

DID YOU KNOW...?

Sudan is the Country with the Most Pyramids in the World

Contrary to popular belief, and although Egypt is globally renowned for its pyramids, Sudan, specifically the region of Nubia, has over 200 pyramids, compared to Egypt's approximately 120.

Historically, after ruling Egypt's 25th dynasty, the Nubian pharaohs fled to Sudan and formed the Kingdom of Kush, incorporating Egyptian cultural and architectural traditions, building numerous pyramids in their territory.

Nubian pyramids tend to be smaller and have a more pointed design compared to the Egyptian ones. One of the most notable sites to visit is Jebel Barkal, known for its well-preserved pyramid architecture. This site includes a small mountain from which you can enjoy the best view of the Nile, especially at sunset.

New Moon: Known as the Black Moon, during this phase, the Sun and the Moon are in the same degree in the sky and it marks the beginning of a new Lunar cycle.

MONTHS	JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC
DAYS	29	27	29	27	26	25	24	23	21	21	20	19

HAIR	PLANTS	FISHING
It is a time of capillary weakness, for this reason, it is not advisable to cut nor dye your hair; as these will weaken your capillary fibers and cause hair loss.	The tree sap descends and concentrates in the root. It is a perfect time to plant and crop maintenance, fertilize and eliminate withered leaves.	The new Moon is responsible for high and active tides, it is the ideal time to fish a shy game that runs away from light and feels safe in the dark. It is the most ideal time for fishing.

First Quarter: Moment in which the Moon reaches the visible surface from the Earth, reaching around 35% to 65% luminosity in the process.

MONTHS	JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC
DAYS	6	5	6	4	4	2	2	1 y 31	29	29	28	27

HAIR	PLANTSS	FISHING
It is an ideal time to cut your hair if your intention is accelerated growth, with vitality and strength.	The tree sap ascends and concentrates in the stock and branches. It is an ideal time for transplanting, and germinating seeds, so they can grow faster; and also sow tall fruit trees.	Responsible for low and steady tides, it is a moment of hard work for fishing, but not impossible. It is recommended to look for fish that enjoy calm waters.

Full Moon: This takes place when the Earth is positioned between the Sun and the Moon, and we can see her illuminated in full splendor.

DAYS	13	12	14	12	12	11	10	9	7	6	5	4

HAIR	PLANTS	FISHING
It is an ideal time to cut your hair, and achieve healthy, strong growth. It is also a good time to treat damaged hair, and dead ends, and go for extreme makeovers.	Tree sap continues ascending and concentrates in branches, leaves, fruits, and flowers. For this reason, plants grow quicker, but the roots do so at a slower pace. This is why this moment is ideal for harvesting fruits and edible leaves.	This Moon is responsible for live-high tides. Time in which fish activity increases. However, fishing is scarce, this is due to the light conditions of the moon interfering with fish baiting, as they just take the bait and leave.

Third Quarter: This is the phase in which the illuminated part of the Moon decreases from 65% to 35%.

HAIR	PLANTS	FISHING
During this phase it is important to cut your hair if your intention is to have it grow slowly but abundantly. It is also an ideal time for dying, as the color will last longer if done at this time.	Tree sap begins its descent and concentrates on branches and stocks. For this reason, it is ideal to seed root plants like tubercles, prune, and water flower plants.	This phase is responsible for dead and low tides, but the excess of light makes the fish not bite as expected. It is ideal to fish at dawn, or during the day to accomplish successful fishing.

Horoscope of the Bristol Almanac 2025

LEO (July 23th - August 22nd). Element: Fire. Quality: Generosity. Color: Orange and Gold. Day: Sunday. Ruler: Sun. Best Compatibility: Sagittarius and Aquarius. Lucky Numbers: 8, 10, 25, 39, 44, and 49. Leo is the fifth sign of the zodiac, a fire sign reflecting its dominant, passionate, and generous nature. People born under this sign tend to be ambitious, creative, and love to stand out in everything they do. They are generous with those they love and enjoy life to the fullest, always looking for ways to express themselves and be recognized for their talents. In the workplace, they will find ways to make significant investments or plan the development of a new professional context; it's important to stay open to new proposals and be flexible to seize opportunities. In love, this year is important for recognizing feelings for someone and making a decision that fulfills the heart, always thinking about self-love and prioritizing oneself. In health, they should be cautious about emotional and psychological disturbances.

VIRGO (August 23th - September 22nd). Element: Earth. Quality: Responsibility. Color: Green and Beige. Day: Wednesday. Ruler: Mercury. Best Compatibility: Taurus and Capricorn. Lucky Numbers: 2, 5, 13, 19, 22, and 43. Represented by the Virgin, Virgo is an earth sign that reflects its practical, analytical, and meticulous nature. It values perfection and efficiency. People born under this sign tend to be practical, hardworking, and detail-oriented, with a strong desire to be useful and improve things around them. They are trustworthy individuals who prefer stability and order in their lives. At work, they should remain calm and avoid rushing; they need to focus on bringing their autonomy and leadership to the forefront. In love, it's a good year to liberate themselves and live a more productive emotional story. In health, they should pay attention to their digestive system, as they may be prone to problems related to stress and anxiety.

LIBRA (September 23th - October 22nd). Element: Air. Quality: Cooperative. Color: Pink and Blue. Day: Friday. Ruler: Venus. Best Compatibility: Gemini and Aquarius. Lucky Numbers: 6, 12, 21, 27, 38, and 41. Represented by the scales, Libra is an air sign reflecting its balanced, sociable, and harmony-loving nature. Libra seeks balance in all areas of life, tends to be kind, fair, and strives to create harmonious environments in both personal relationships and their surroundings. In the workplace, their knowledge will be in high demand, leading them to believe that this is the right time to change routines. It's a year of hard work that requires more commitment and dedication. In love, it's a suitable year to structure a relationship with that special someone; they should set aside insecurity and begin living the relationship they have long awaited. In health, they should maintain healthy habits that, combined with stress reduction, will help avoid intestinal problems.

SCORPIO (October 23th - November 21st). Element: Water. Quality: Loyalty. Color: Scarlet and Black. Day: Tuesday. Ruler: Pluto. Best Compatibility: Cancer and Pisces. Lucky Numbers: 1, 4, 29, 30, 34, and 42. Represented by the scorpion, Scorpio symbolizes its intense, emotional, and mysterious nature. People born under this sign tend to be mysterious, passionate, and determined. They are individuals who are not afraid to confront difficulties and seek the truth in all areas of their lives, pursuing their goals with unwavering determination. In the workplace, this year begins with open doors, providing opportunities for expansion and growth in all senses; job offers will arrive from multinational companies or other cities. In love, it's very important to evaluate relationships that exert any type of control and are unhealthy for emotional development. In health, anxiety may lead to excesses in eating, resulting in issues with cholesterol and weight.

NATURAL HAIR CARE TIPS

The sun, pollution, bad styling habits, and hormonal changes are just a few reasons why our hair can look dull, dry, and lifeless. Below are some natural tips to prevent this damage:

1. Protect your hair from the sun: Hair loses melanin and fades when exposed to the sun, especially if it's artificially colored. Protect it with natural products like hyaluronic acid, which retains moisture and shields it from external factors.

2. Masks with natural extracts: Plant extracts like aloe vera provide vitamins, minerals, and antifungal, antiseptic, and antibacterial properties, helping to combat scalp issues like dandruff.

3. Use of oils: If your hair is damaged, has split ends, and is difficult to detangle, the fatty acids in olive oil are ideal for softening, repairing, and nourishing your hair.

4. Honey, an ancient remedy: Honey is used on hair to deeply hydrate, nourish, stimulate natural keratin production, and add shine.

5. Oat and rice milks: Oat milk soothes sensitive and irritated scalps, while rice hydrates the hair fibers. Both can be used together or separately to protect delicate hair with dry ends and a tendency to fall out.

Finally, always rinse your hair with cold water, as it improves circulation in the scalp and combats excess oil in your roots.

HOW DO STARS DIE?

Stars die in different ways depending on their mass:

1. Low-mass stars (like the Sun): When they run out of nuclear fuel, they expand and become red giants. Then, they eject their outer layers, forming a planetary nebula, while the core collapses into a white dwarf, which cools down slowly until it fades away.

2. High-mass stars: After exhausting their fuel, they explode in a supernova (an extremely powerful explosion that releases an enormous amount of energy, shining brighter than an entire galaxy for a brief period). Depending on the remaining mass, the core may collapse into a neutron star or a black hole.

The most recent recorded death of a star was a supernova called SN 2023ixf in the constellation Virgo, discovered in May 2023. In all cases, the death of a star is a process that can take millions of years.

Horoscope of the Bristol Almanac 2025

SAGITTARIUS (November 22nd - December 21st). Element: Fire. Quality: Generosity. Color: Purple and Blue. Day: Thursday. Ruler: Jupiter. Most compatible with Aries and Leo. Lucky numbers: 4, 18, 23, 29, 37, 49. Represented by the archer or centaur, Sagittarius is a fire sign, reflecting its adventurous, optimistic, and energetic nature. People born under this sign are natural explorers, both of the physical world and the intellectual realm, and they enjoy sharing their optimistic outlook on life with those around them. Work will undergo significant changes; this is a year that favors renewing the work environment with the possibility of activating a change of scenery. It's an opportunity to work from home on that venture that will yield the desired fruits. In love, it's important to highlight that Sagittarius values freedom and independence in relationships, so the search for a partner who shares their love for adventure will come; one just needs to organize their thoughts and be willing to grow and explore together. Regarding health, attention should be paid to the circulatory system, and it's also important to regulate energy to avoid exhaustion.

CAPRICORN (December 22 - January 19). Element: Earth. Quality: Determination. Color: Brown and Gray. Day: Saturday. Ruler: Saturn. Most compatible with: Virgo and Taurus. Lucky numbers: 4, 8, 16, 25, 46, 47. Represented by the mountain goat, Capricorn is an earth sign, reflecting its disciplined, ambitious, and practical nature. People born under this sign are typically ambitious, practical, and decisive, with a strong work ethic and a deep sense of duty. They are persevering and willing to do whatever it takes to achieve their long-term goals. In the work realm, it's time not to carry the entire burden on your shoulders; it's best to ask for help from colleagues or more experienced professionals to reach your goals. In love, the doors are open; it's necessary to leave behind past wounds to illuminate a future with your current partner or with the person who is about to arrive. In health, one should be cautious of headaches associated with migraines, and incorporating moments of relaxation and recreational activities into your routine is essential for well-being.

AQUARIUS (January 20th - February 18th). Element: Air. Quality: Independence. Color: Blue and Silver. Day: Saturday. Ruler: Uranus. Most compatible with: Gemini and Libra. Lucky numbers: 18, 19, 25, 27, 36, 40. Represented by the water bearer, Aquarius is an air sign, reflecting its innovative, independent, and humanitarian nature. People born under this sign are typically independent, progressive, and always looking for ways to improve the world around them. In work, a new professional cycle begins, mainly focusing on making the right decisions to ensure that the investments under your responsibility provide the expected well-being. In love, the sacrifices of past relationships will fade with the arrival of a new love; it may take time for you to be together, but it's essential to give time for emotional unblocking. In health, fatigue can cause muscular and bone discomfort, so consider treatments like acupuncture, essential oils, and massages.

PISCES (February 19th - March 20th). Element: Water. Quality: Creativity. Color: Lavender and White. Day: Thursday. Ruler: Neptune. Most compatible with: Scorpio and Cancer. Lucky numbers: 4, 29, 39, 40, 42. Represented by two fish swimming in opposite directions, Pisces is a water sign, reflecting its empathetic, intuitive, and dreamy nature. People born under this sign are typically sensitive, creative, and deeply connected to their emotions and those of others. They are dreamers, able to see the world through a unique and meaningful lens. In the work sphere, assertive communication for closing deals will be the ace up your sleeve to achieve success. In love, it's time to look into your heart for the best way to use resources to improve living conditions and thus restore that spiritual connection, which is the foundation of the relationship. In health, Pisces should care for their immune system and feet; it's important to maintain a balance between their emotional world and reality, avoiding excessive stress. Practices such as yoga and meditation are beneficial for their well-being.

DEAR READERS

In this edition, we want to express our heartfelt gratitude for your continued support over these 193 years. Your loyalty and enthusiasm have been the cornerstone of our publication, and we could not have made it this far without you. Every edition we have published, every article we have written, and every valuable piece of information we have shared has been driven by the desire to provide you with content that is relevant, interesting, and valuable to you.

Over nearly two centuries, we have witnessed many changes in the world and have evolved to remain an almanac of information and entertainment. However, one thing has remained constant over time: our gratitude towards our readers, for being part of this journey, for using our Bristol Almanac as a reference tool in your daily activities, and simply for being Bristol fans at heart.

We hope you enjoy our content as much as we enjoy creating it. Each page is filled with information about the moon, stars, astronomical data, fun facts, jokes, hair care, plants, fishing, and much more, where we transform our love for what we do into words year after year.

Each time you purchase the Almanac, make sure it is ours-the legitimate, original Bristol Picturesque Almanac. Do not accept imitations!
